Breif Summary of the Invention

The invention a security system that will anticipate a  
Problem before it transpires

COPY OF PAPERS  
ORIGINALLY FILED

---

### Background of the Invention

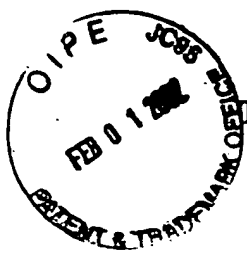

The invention is a hybreed of technologies that exist

That used in this configuration will produce a configuration

That will in advance recognize a problem.

### **Cross Reference**

**There is no cross reference to this title, because it is a specific design to be used as a security system**

### Detailed description of the invention

The invention is neveau thinking tthat came to light,in june of 1999;

In incoperates many technologies that are on the market ,but never

Used in this way ,it can mirror and or dirict an fl4 fantom jet on its

Way and pin point a problem before it starts,and is usable to

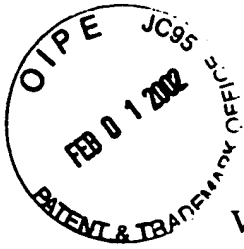

Areas,personell and buildings.thus allowing an item to be in a matrix

Putting it thu aseries a of situatuions while the subject is on screen

In what is called virtual reality.

Virtual reality into matis plus programming

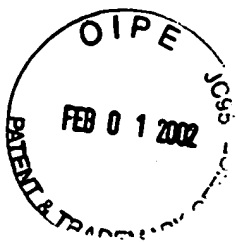

Inventor

George Guarracino  
33 Blossom St.  
Boston MA. 02114

- 1a] virtual reality is described as any item that can be picked out  
of real life.
- 2a] a matrix is described as as holding tha t item or [thing]  
as to where it would be on a map.
- 3a] programming is described a the vechile that would move  
that item or [thing] within the matrix.

**Statement regarding federal sponored**

Because this is a private enterprise not associated with  
Foundations, federal funds are virtual out of reach.

Field of endeavor

COPY OF PAPERS  
ORIGINALLY FILED

AS mentioned before the invention, field of endeavor is ,

                     A security system that would be applicable to in descending

Order personnel, buildings, and areas, that would anticipate a problem

Before it happened.
